

**PRODUCED BY EXPERTS  
FOR EXPERTS!**

An aerial night view of Singapore, featuring the Esplanade - Theatres on the Bay and the Marina Bay Sands. The image is overlaid with a glowing blue network of lines and nodes, suggesting a digital or technological theme. A blue banner is positioned across the middle of the image.

# About us

**Produced by experts for experts.**

Our laboratories produce a wide array of solutions used by private investigators, Law Enforcement units, intelligence agencies, state organizations, and television channels worldwide.

## YRI SPECTRUM ANALYZER

The YRI Spectrum Analyzer is designed to detect illicit eavesdropping signals, perform site surveys for communication systems, conduct radio frequency, analyze, and investigate misuse of the RF spectrum.

The YRI is a portable system with three types of TSCM solutions; the spectrum analyzer that sweeps 6 GHz in real time, a Wi-Fi network scanner and a wireless camera scanner.

**The hardware of the system comprises of:**

i7 Lenovo touch screen computer, a Samsung tablet, wireless camera detector, USB connectors, fan, antennas etc. The system can be divided in to two independent portable units with internal batteries for 3 hours of operation.

## TAVOR AUDIO RECORDER

A miniature recording device for covert audio surveillance. Highly sensitive, records 12 bit with low power consumption support up to 256 GB.

### Special control software with optional:

- Time scheduled recording.
- Encryption by drawing.
- Voice Activation (VOX).
- Sampling frequencies 5-44 kHz uncompressed or with 4bit ADPCM.
- Automatic gain control (AGC).
- Knowles microphone.

## CARMEL AUDIO RECORDER

A small audio recording device in a size of SD card. Highly sensitive recording saved to a microSD card that support up to 128 GB.

### Special control software with optional:

- Time scheduled recording, encryption.
- Voice Activation (VOX), Adjustable recording qualities.
- An internal battery for memory configuration.
- Knowles microphone.
- Download records by USB Connector.
- Operates voltage 5v.

## TAVOR CK

Professional audio recording device hidden in original car key holder (such as Hunyadi / VW, etc.)

### Special control software with optional:

- Time scheduled recording.
- Encryption by drawing.
- Voice Activation (VOX).
- Sampling frequencies 5-44 kHz uncompressed or with 4bit ADPCM.
- Automatic gain control (AGC).
- Knowles microphone.
- Rechargeable Battery for 20 hours of continuous recording.

## HERMON-MICRO AUDIO RECORDER

High quality sound recorder with a built in memory of 4GB.

### Unique control software with optional:

- Encryption.
- VOX or scheduled recording.
- Quality 5-22 kHz uncompressed or 4 bit ADPCM.
- Auto gain control (AGC).
- Knowles microphone.
- Operates with 3v battery.

## STING 2

Audio recording device with a built in 4GB memory. High quality, ideal for recording a meeting, easily integrated inside a bag etc.

## STING 3

Miniature professional recorder. Smaller than AAA battery. Enables continuous recording (25 HRS) or by VOS -35 hours- 3 levels of recording qualities HQ, LP AND XHQ.

## STING 5

Professional audio recorder delivers high quality recording.

### 2 recording modes:

Continuous mode -12 days or by VOS up to 30.

## STING 10

Electric socket with an integrated high quality audio recorder. Ideal for long operational missions. The system captures sound of the entire room. Software configuration. Optional encrypted files, scheduled recording etc. a variety types of the socket are available for different countries.

## FIXED LINE AUDIO RECORDER

ASDL filter embedded with hidden recording system. The device receives its electrical current from the phone line. Records up to 1,000 hours conversation on removable able micro SD card.

## HIDDEN AUDIO RECORDER IN BELT BUCKLE

Belt buckle with hidden space store and conceal recording devices, GPS, GSM etc. Ideal for undercover agents. Available in 3 colors.

## INTEGRATE AUDIO RECORDER INSIDE A CARTOON

- A miniature recording device for covert audio surveillance that integrate inside a cartoon.
- Highly sensitive recording with encryption saved to a micro SD card that support up to 256 GB.
- Ideal for installation inside a book, boxes.
- Configuration by special software.

## EAGLE 5

Tactical hidden HD camera recording placed in electrical box in a size of 7x6cm. Records up to 48hrs by motion detect to a micro SD card (up to 128GB). Option for schedule recording, motion detect, date time stamp. Configuration by software.

## EAGLE 5+ HIDDEN CAMERA IN ELECTRICAL BOX 10X10

Tactical hidden HD camera recording placed in electrical box in a size of 10x10cm. Records up to 7 days by motion detect to a micro SD card (up to 128GB). Option for schedule recording, motion detect, date time stamp. Configuration by software.

## EAGLE 10

Electric socket with hidden camera. support up to 128GB. Operates by battery for 24 hours in motion detect mode. Download data by hidden connectors. a variety types of the socket are available for different countries.

## ROCK WITH CAMERA

Integrated system with standalone DVR and camera, hidden inside realistic rock from polymer or other material. Ideal for tactical operations. Operates up to 10 days in the field.

## Z-16

DVR module with low power consumption for integration. support two kinds of cameras 160 degrees (wide range) and 68 degrees (pinhole). Can records by motion detect to a micro sd card (up to 128GB). Option for schedule recording, motion detect, date time stamp. Configuration by software.

## CAR PHONE HOLDER WITH DVR

Hidden HD camera placed in a car phone holder. Ideal for recording hidden movies inside a car. Records up to 15 hours by battery or continuous recording by connecting to the car voltage. Option for motion detect, schedule recording, date time stamp. Configuration by software.

## KIDON - WIFI AUDIO RECORDER

Audio recording system that transmit the recorded files by WI-FI to a mobile phone / tablet / computer by access point or by WI-FI network. Can transmit the files to FTP server or email. Designed specifically for law enforcement agencies.

Configurations by friendly interface.

### Programming Options:

- Adjustable recording qualities.
- Voice detection (VOX)
- Scheduled Wi-Fi activation
- Operates by: 3.7v - 5v

## ARBEL GSM BUG

Professional listening device for real-time surveillance in a size of a sim card. One of the smallest GSM listening devices Available today in the market. Operates using a micro sim. High quality microphone for quality sound, Password protection for authorized listener.

open the microphone and DTMF for gain control 1-5.

Operates by: 3.7v - 5v

## ARBEL TL-GSM LISTENING DEVICE FOR LANDLINE

GSM bug for listening to incoming & outgoing calls on a land line in real-time; transmitting the conversation through the cellular network to the administrator's phone that configured by SMS command.

## Z62 HIDDEN WI-FI CAMERA MODULE

Hidden Wi-Fi / 3G HD camera module.

Enables to transmission of video & audio by 3G or Wi-Fi to a mobile phone (by App) or to computer. Low power consumption for long operation. May be operated by p2p up to 25 meters. Easy interface for system configuration. Can be alerted motion. Supports 64 GB SD card.

Operates by: 3.7v - 5v

## HIDDEN 3G CAMERA IN ROCK

Hidden HD 3G camera integrate inside realistic rock. Enables video transmission by 3G. Can be operated P2P up to 25 meters. Can watch the video broadcast and the recorded files with special app to cellphone / tablet / computer. Ideal for tactical operations.

Operates up to 72 hours in field.

Option to add additional battery.

### TACTICAL SYSTEM WITH INTEGRATE 3G HD CAMERA IN WALL SIGN

3G Hidden HD video surveillance system integrated inside a wall sign in a thickness of 1cm. Ideal for tactical units in urban areas. Live video streaming, motion detect alarm and files download by web. Operate by special APP or web May be attached with scotch tape or magnets to a wall.

### HIDDEN 3G CAMERA IN ELECTRICAL BOX 10X10

- Hidden HD 3G camera integrate inside electric box 10x10cm.
- Enables video transmission by 3G. Can be operated P2P up to 25 meters.
- Recorded files can be downloaded with special app to cell / tablet / computer.
- Ideal for tactical operations. Operates up to 24 hours in field.

### TACTICAL WI-FI TRANSMITTER WITH HIDDEN BUTTON

- Micro Wi-Fi system with button camera.
- Operates by Wi-Fi or by 3G router.
- Ideal for undercover operations.

## AUDIO JAMMER KOL1

A professional device that disrupts microphones in its vicinity. Using this device, which uses ultrasonic waves, ordinary microphones, such as cell phones and recording devices, laser microphones and directional microphones can be disturbed.

## HIDDEN WI-FI HD CAMERA IN LAPTOP ELECTRIC ADAPTOR

Hidden Wi-Fi HD camera integrate inside a laptop electric adaptor. Enables to transmission of video & audio by Wi-Fi to a mobile phone (by App) or to computer. Can be alerted motion. Supports 64 GB SD card.  
**Operates by:** 3.7v - 220v

## HIDDEN HD CAMERA WITH WI-FI IN SMOKE DETECTOR

Hidden HD camera with wi-fi that integrate inside a smoke detector. Enables video&audio transmission and can be operated also by P2P up to 25 meters, with motion detection alert, schduale recording. video broadcast by App or by web interface. Ideal for tactical operations.  
 Operates up to 12 hours in field.  
 Option to add additional battery.

## R9 RECEIVER

Analog RF audio receiver operates on 418 or 433 frequencies. Works on 9v battery or by electricity supply 7-24 VOLTS. 2 outputs for audio recorder and headset. On-off and volume control switch.

## RECEIVER INTEGRATED INTO SONY RECORDER

- Analog RF Audio receiver, integrate inside a Sony audio recorder.
- Operates on 418 or 433 frequency.
- Works on 2 AAA batteries or by electricity supply 5v.

## AUDIO TRANSMITER LINE

- Analog RF Audio transmitters.
- Functions on 418 or 433 frequencies.
- Bug coin with 3v battery for 48 hours of transmitting, 3.7v bug, and 220v bug for electricity of fix line bug.

## GPS TRACKING SYSTEM

Tactical GPS system with additional battery for more than a month of operating and a small bag with high power magnet for under cars mounting. Control on the system is via an application or PC interface. Provides position intervals between 1-120 minutes, moving alert, virtual fence etc. Operates on roaming sim card worldwide.

## NANO TRACKING DEVICE OPERATE BY GSM / WI-FI / BLUETOOTH

Nano GPS tracking device in a size of SD card and in a thickness of 4mm. This unique device can transmit his location by GSM and in a case of no signal by Wi-Fi or Bluetooth with no password needed. With a lower power consumption and roaming SIM card (included, this is one of the leading devices available in the market. Friendly tracking interface using an APP or web browser.

## TRACKING BOX WITH GPS & GSM

13cm x13cm box with various surveillance and supervision systems for a 3 months operation. The GPS may be operated worldwide with a roaming card, controlled via an app or web interface. The unit can broadcast at 1-120 minutes intervals. Provide motion alert. The GSM listening system provides real-time audio, operating at 850/900/1800/1900 frequencies.

## BELT BUCKLE WITH HIDDEN GPS TRACKING DEVICE

Belt buckle with hidden integrated GPS for security of the person who wears the belt. Recommended in kidnaps and emergency events. By pressing on the hidden alarm button the position will send to people that defined.
